

Night Vision Series

**Description:**

*"Enhanced views, savings and comfort.*

*The night vision series helps block the sun's UV rays, the largest single cause of fading, reduce glare and reject up to 71% of the sun's heat. Night Vision films allow 15% to 35% of the natural light into your rooms by day, and thanks to a low interior reflectivity, you can still enjoy the view out by night."*

**Key Features:**

- Offers enhanced views with low interior reflectivity, especially at night
- Made with a scratch-resistant coating to ensure clear views
- 3M™ nano-technology enhances the film's color stability
- Rejects up to 71% of the sun's heat to help reduce glare and eye discomfort
- High UV & IR blocking greatly slows sun damage & fading
- 2-mil thickness with high performance adhesive
- Limited lifetime manufacturer backed residential warranty

The Skin Cancer Foundation recommends this product as an effective UV protectant.

Notes:

1. Performance results are calculated using NFRC methodology and LBNL Window software, and are subject to variations within industry standards and only intended for estimating purposes. This data is provided for informational purposes only and are subject to normal manufacturing variances.
2. Testing performed on 1/4" (6mm) clear glass and are subject to variations within industry standards.
3. Performance results for glare and fade reduction are calculated by comparing filmed glass to that of untreated glazing.

Specifications	NV35	NV25	NV15
Total Solar Energy Rejected (T <sub>SER</sub> )	52%	61%	72%
Visible Light Transmittance (V <sub>LT</sub> )	36%	24%	15%
Exterior Visible Reflectivity	13%	19%	38%
Interior Visible Reflectivity	7%	7%	11%
Sun Glare Reduction	59%	73%	83%
UV Rays Blocked (both UV-A & UV-B)	>99%	>99%	>99%
